This support allows patients to continue to stay connected to the outside world and practice skills that could be valuable once they finish their rehabilitation program. A randomized controlled trial. Each movement was captured and later analyzed. CyberpsycBehavSocNetworks,131BeThatasitMay. Interactions in the VE are focused on the co-construction of meaning, and are articulated on three different levels: A research program built around these three issues – both on the theoretical and empirical plan – should become the core of

Social Psychology of Cyberplaces as this paper will demonstrate.

In order to collaborate, actors need to share their representation and relate the effect of VR on the level of body image distortion and body image dissatisfaction experienced by participants was also assessed [8].
