### **Stanford SOLAR Center -- Ask A Solar Physicist FAQs - Answer**

Stars are giant, luminous spheres of plasma. There are billions of them – including our own sun – in the Milky Way Galaxy. And there are.

### **The Stars Were There - Damian Robb**

There were no such things as stars. When night time came, the sky turned black. There were no pretty, twinkling lights for everyone to look in the sky. Can you.

### **Star - Wikipedia**

The flag of the United States of America, often referred to as the American flag, is the national . While there are many examples of star arrangements, some of those flags included blue stripes as well as red and white. Benjamin Franklin.
