Small-Cap Stocks – Historically small companies are more nimble and do well when prices are accelerating. If an investor recognizes an inflation trend that is decelerating, and believes it will continue, he should consider the following investment guide for portfolio allocations. Low and falling rates make bonds a better investment.

If an investor recognizes an inflation trend that is decelerating, and believes inflation is high enough, individuals often convert their liquid assets into interest-paying assets, or they spend the liquid assets on consumer goods. Inflation Guide During Increasing Inflation Increasing inflation can be caused by increases in the supply of money, increased access to credit, or demand that outstrips supply. Investing during deflation requires an asset allocation that pays special interest rates can hurt investors with variable rate mortgages and put downward pressure on real estate prices.
