For the busy professionals whose boss wants them to jazz up their Web site, or the student burning the midnight oil to put together some Web animations for a class, *Creating a Web Site with Adobe Flash CS4 Professional*: This is problematic because it doesn't give a me a better understanding of how to use Flash really. I hope my review can help allot of people make smarter choices One other thing I discovered, this book is dedicated to using flash CS4, do not use flash CS5 or any others lower than CS4 else you will be stuck at certain chapters in this book and have to revert back to Flash CS4, finally someone said there's errors when testing which is totally not true, You have to follow instruction exactly how it was given or else you will get allot or errors especially when it comes to writing the codes.

Ifyouareasellerforthisproduct,wouldyouliketosuggestupdatesthrough Visual QuickProject Guide is just the book they need to start creating Flash sites in an instant. View or edit your browsing history. Want to Read saving...
