A mental journey that Ferragamo makes in the visual culture of Italy in the Twentieth century. The exhibition at the Salvatore Ferragamo Museum, conceived by the director Stefania Ricci and Il visitatore (Dal mondo) (Italian Edition) by Carlo Sisi, was inaugurated last May on the occasion of the ninetieth anniversary of the return of the designer Salvatore Ferragamo, in Italy, after a training trip to America that lasted longer than a decade. As some viewers might have a limited knowledge on this type of lesser-known style of art, the texts really help to connect what the curator wanted to the visitor to get from the experience. The choice to set up this exhibition inside the salon is a success because the exhibition aims to not only at children but also looks to educate the public about an often-overlooked type of art. An overall fascinating and exciting exhibition for what it exposes and for what intentions, but at times chaotic and not easily appreciable at the height of its potential.
