If im holding a box connected to a non stretching rope to my hand and i start accelerating upwards gravity pulls down How would i describe a tension in a string if my acceleration is increasing with time defined by some function. So to get to the point, the documentary spoke of a theoretical way to extend human life to years long. This is called interference. Theevent, isopentothe publicatnocharge. KoreanMovieNightApr. I think you are overreacting a little bit here! If im holding a box connected to a non stretching rope to my hand and i start accelerating upwards gravity pulls down How would i describe a tension in a string if my acceleration is increasing with time defined by some function. However, as you get farther away from a source, its brightness gets smaller, so we introduce a quantity usually called intensity or flux which is indicative of energy at some distance passing through some area in one second. Soinanutshell, iselectricityallthereis? You must mean period of oscillation, not of rotation. I would conclude that your book is wrong, the heavy skier jumps farther.
