It then progresses to a review of the audio and video options that are available and looks at the selection of game software and cabinet artwork. If you were a teenager any time between—the introduction of the first Pong console—and the year the home console industry really took off with the introduction of the Super NES at the same time the pinball and video game industries started getting Project Arcade: Build Your Own Arcade Machine and charging fifty, seventy-five, even a dollar per game you probably spent some time in coin-op arcades. As a beginner woodworker, I was able to follow along and built my very own arcade many years ago that is still working today. Chapter 6 Building the Control Panel. Thanks for telling us about the problem. Plan for your space and budget 2. But if you just want to plug an old computer into the TV you probably don't need it. About Project Arcade:
